HARD BAGS

Dear Customer,
Two-wheeled electric mobility is evolving rapidly, continuously transforming and growing on a global scale.
Following the evolution in consumer demand, stemming from the spread of electric vehicles and new trends, we are introducing new and important job opportunities for everyone.

At GIVI, we understand that we need to make dedicated tools available to you to stay up to date with the new special accessories that we are developing for electric vehicles and the offer of universal accessories with adaptable function, size and design.

With our new approach to electric mobility and the new generation of riders, we are adding some new sales tools to the current ones.

MONOLOCK® SYSTEM

Monolock®, a patented fitting system, designed for top cases with smaller capacity and usually used on scooter and small motorcycle. Even with limitations of maximum load, this system guarantees ease of use together with a high reliability and durability with components boasting lighter and far smaller dimensional restrictions. Because of its natural compatibility with different kind of motorcycles, it is appreciated by the most important brands of motorcycles producers.

MONOKEY® SYSTEM

Patented by GIVI, Monokey® Side represents an interesting evolution of the classic system constituted by the "fitment Kit plus the side-bag". The new solution introduces new advanced technical features and some other point of interest: the cases that adapt Monokey® Side can be recognized by shaped profile of the bottom and by the addition of two new fixing points, composed by "sleds". The latter receive the disengagement movement from the case release button and determine a significant anf further increase in overall stability. Monokey® Side xzallows greater adhesion of the case to the side of the motorcycle, improving the aerodynamic aspect. The motorcyclist's habits won't change, since it will continue to open/close and attach / detach the case equipped with Monokey® Side with one key and push button.

FIXED® SYSTEM

Underbone street bike is the most common motorcycle type widely used in many Asian cities. Basic, yet slim rack system mounted on the motorcycle - great for everyday ride in heavy traffic congestion. Its compact locking and racking system combination - better fit the size and weight of the underbone street bike.

SPORT-T RANGE

A line of semi-rigid bags designed for "quick-tourism". Developed to obtain compact volumes and shapes with sports lines. The Sport-T range is particularly suitable for road and sport-touring bikes, with medium to medium/small volumes and technical fabrics laminated and with a reinforced structure (water-resistant, with UV protection). Tanklock and Multilock systems patented by GIVI adds further practicality of use, making the fitting/release system fast and secure.
