GIVI boasts a production site that covers an area of over 30,000 sq mtrs, with a staff count of more than 150 employees, that take great care in all phases of production, from research / product planning to distribution, and having the ability to make use of the most modern technologies available, in order to achieve production responding to market requests characterized by a high technological content.

MADE IN ITALY

GIVI placed all manufacturing units and the main logistic warehouse within a few kilometers radius from the Headquarters in Flero (Brescia). A total of more than 150 trained employees work here, setting up and monitoring the work of advanced tools and production machinery.

GIVI is a strong believer in automation. It's our highly skilled technicians who ultimately refine, assemble, polish and check the coupling of each and every product, ensuring optimum quality.

Today just a few Italian companies are structured to follow the true concept of bringing "Made in Italy" quality to the international market; GIVI is among those.

THE R&D DEPARTMENT

The need for a technical office has been a GIVI priority since the very beginning. The decision to turn it into a fully independent R&D Department was finalized when the company entered the motorcycle helmet sector as a manufacturer. The R&D Department is the pride of GIVI: inside its offices a full team of technicians, designers and engineers follow new projects through every single stage.

A second, smaller but fully equipped R&D Department works on the projects aimed toward the South Asian market. This unit is located inside the manufacturing unit of GIVI Malaysia, however all the main ideas and innovations fielded mostly during the last 10 years by the brand, were born in Flero. This is a very important area composing of a light and airy, open "thinking" space, and a helmet testing lab.

MANUFACTURING

The manufacturing and plastic injection centre is also located in the city of Flero. Here the polymers, the raw material used to manufacture the hard side and top cases, are blended to GIVI's specifications. After strict quality control they are conveyed to the automated injection press line. The unfinished products are then processed by anthropomorphic robots that complete the main assembly stages. In a nearby area the latest generation CNC mills cut the molds. In the final stage, all the molds are manually checked to assure the perfect alignment of their components.

All metal parts are manufactured in the metal works facility, also located in Flero. CNC mills cut, bend, weld and machine the metal with the highest precision. Every single piece composing our motorcycle fitting kits for side and top cases comes from this facility. The laser cutting of the metal sheets allows absolute dimensional precision, within a 0.1 mm tolerance.

QUALITY CONTROL

One of our strongest assets is the pursuit of a quality standard that can greatly elevate the riding comfort and safety of motorcyclists.

This is GIVI's mission. A commitment made possible by teamwork, based on responsible product development and great respect for the end user.

GIVI employs the best available technology to offer ease of use, safety and emotional involvement, turning the brand into a lifestyle. Composite techno fibres, exclusive techno polymers, complex molds, high precision machinery and injection processes, strict quality controls, products, shapes, details and ever new destinations of use testify the total dedication of the brand to the consumers' needs.

MONOKEY® SYSTEM

Monokey®, patented by GIVI, is the most widespread fitting system for hard cases and side cases. Simple to use, Simple to use, it allows the opening of the top case lid and the detachment of the case from the fitting plate with just one key. All the Monokey® products combine the best characteristics of mechanical resistance and rigidity of the fitting, with features including compact and light components. The even distribution of the load on the plate surface is guaranteed by the three fitting points. The damping of oscillation and vibration and the contact between the bottom shell and the plate are assured by four spacers made of elastic material, which is particularly resistant to extreme weather and temperature variation. Thanks to these solutions a high level of reliability of the fitting is guaranteed.

MONOLOCK® SYSTEM

In order to offer a wider range of applications and uses, GIVI has introduced Monolock®. Following the same philosophy that defines the Monokey® fitting system; this second solution is mostly made for lighter vehicles, such as scooters and maxi-scooters. Even with limitations of maximum load, this system of fitting combines performances comparable to those of the Monokey® system with components boasting lighter and far smaller dimensional restrictions. Because of its natural compatibility with different kinds of motorcycles, it is appreciated by the most important brands of motorcycle producers, who have adopted it for their original accessories. As well as for Monokey®, the opening of the case top shell and the detachment of the case from the plate are operated with just one key.

RETRO-FIT SYSTEM

RETRO-FIT is the new mounting system that opens new opportunities for the rider, allowing him to attach a set of aluminum Trekker Dolomiti side cases to any existing PL and PLR mounts, originally designed for Monokey® cases. With this quick and secure adapter, it takes seconds to attach and detach the cases, without using any tools: the bottom part slides over the prongs on the bracket, while the top part is secured using two quick release fasteners, that fit to the included support which replaces the standard Monokey® locking wedge.

MONOKEY® SIDE SYSTEM

Introduced to the market in 2006, the Monokey® Side attaches onto the side of the above-mentioned two fitting systems, and thereby introducing different fitting solutions for the motorcyclist. Patented by GIVI, Monokey® Side represents an interesting evolution of the classic system constituted by the "fitment Kit plus the side-bag". The new solution introduces new advanced technical features and some other points of interest: the cases that adopt Monokey® Side can be recognized by the shaped profile of the base and by the addition of two new fixing points, composed by "sleds". The latter receive the disengagement movement from the case release button and determine a significant and further increase in overall stability. Monokey® Side allows greater adhesion of the case to the side of the motorcycle, improving the aerodynamic aspect. The motorcyclist's habits won't change, since it will continue to open/close and attach/detach the case equipped with Monokey® Side with one key and push button.

MONOKEY® CAM-SIDE SYSTEM

The Trekker Outback are cases especially created for off-road use. To support all the demands of off-road travel, a fitting system and side-case holders stronger than standard Monokey are required. For this reason, the new Monokey Cam-Side system has been developed which fixes the case in four different points whilst at the same time maintaining the possibility to be released quickly from the rack. The specific side-case holders are the PL__CAM and PLR__CAM that are manufactured using tubular steel with an 18 mm diameter, and are fixed to the bike in different points, in order to strengthen the structure. Besides the panel of the frame where the case is linked, it is better if the rubber support points are moved in the perimetric zones of the case.

EXTRA CARGO
BAGS

T460B

The TFS System has been created to simplify the fixing of tank bags onto plastic tanks that, unlike metal ones, cannot be used with a magnetic fitting system.

It is based on a laminated EVA polyester foil covered with anti-slip PVC which, once it is attached to the bike by using the 4 adjustable belts, is the base to quickly fasten and unfasten the bag to the bike.

The TSF measurements means it is usable for most motorcycle models and the system allows the fastening of all tank bags in our range, with the exclusion of TANKLOCK bags

TE_ _ _

TUBULAR HOLDER

(IT CAN ALSO BE USED AS HOLDER FOR SOFT LUGGAGE)

Insert the key into the lock and turn it, locate the bag onto the TE specific frame so that the two tabs positioned on the lower section of the attachment system hold onto the base of the bag; then push the bag onto the frame to attach it. To remove the key, rotate it in a vertical position.

For prices of motorcycle specific items, (TE_ _ _ _) please refer to the section "SPECIFIC EQUIPMENT FOR BIKES AND SCOOTERS".

SADDLE BAGS

T_ _ _

TUBULAR HOLDER

In order to attach universal soft side bags in a safe and secure way, GIVI has created and produced stabilising holders for various motorcycle models. The mounting of these side holders enables bags to be attached in such a way so as to avoid damage due to the proximity of the exhaust pipe when the bags are mounted.

For prices of motorcycle specific items, (T_ _ _ _) please refer to the section "SPECIFIC EQUIPMENT FOR BIKES AND SCOOTERS".

In the event that there is no specific tubular holder for your model of motorcycle on which you can mount the soft side bags of your choice, we suggest mounting the bags directly onto the motorcycle, obviously ensuring that the bags are securely attached and that they do not come into contact with the exhaust pipe, rear wheel and do not cause any interference with any other moving part of the motorcycle.

TANK BAGS

MAGNETS KIT - T4KIT

T4KIT

MAGNETS KIT

(Comprising 4 magnets to allow the mounting of a tank bag onto a metallic tank). All tank bags are prepared to contain either 2 or 4 magnets.

Simply insert either 4 magnets into the appropriate slots on the bag and mount the bag onto the motorcycle fuel tank.

BELTS INCLUDED - ALL TANK BAGS ARE SUPPLIED WITH 4 BELTS

- Bind the included belts onto the frame of the motorcycle
- Attach the other end of the belts to the D-rings on the base of the bag

TFS (TANK FITTING SYSTEM) - Universal base for tank bags

T460B

The TFS system has been created by GIVI to simplify the fixing of tank bags onto plastic tanks that, unlike metal ones, cannot accommodate a magnetic fitting system. It is based on a laminated EVA polyester foil, covered with anti-slip PVC which, once it is attached to the motorcycle using the four adjustable belts, is the base to which the bag can be quickly fastened and unfastened. The TFS measurements (see table below) means it can be used on most makes of motorcycle and the system allows the fastening of all tank bags in our range, with the exclusion of our Tanklock bags.

- Attach the TFS (Tank Fitting System) on the frame of the motorcycle, using the 4 adjustable belts included
- Attach the bag onto the TFS base using the belts included

TANK BAG FOR ENDURO BIKES WITH SPECIFIC BASE INCLUDED: EA110B and EA116

< **EA110B** - Tank bag for the following Enduro motorcycles with specific base included

> **EA116** - Tank bag with specific base included for HONDA NC 750 X (16 > 19)

Can be used on other makes / models of motorcycles, simply check compatibility of the base of your fuel tank with the dimensions shown opposite or use the straps provided.

TANKLOCK TANK BAGS - Tanklock System

BF__

Mount the specific BF__ kit to the fuel filler cap and fit the tanklock bag by positioning it on the flange using a slight amount of pressure.

To release the bag, simply pull the red lever positioned on the base of the bag

Flanges do vary, therefore you must check the compatibility list contained within the section "specific equipment for bikes and scooters".

ACCESSORIES

The collection of GIVI products includes a wide variety of accessories that have all been designed with the purpose of helping to improve security, practicality and comfort whilst riding on two-wheels. Some products are dedicated to the rider, some to the passenger and some to the conveyance itself but each one is a worthy addition to our range.

For example, from the child's seat which is very useful around town; the universal satnav / smartphone holder or the telepass holder, easily adaptable to two or three wheeled machines; the very useful specific backrests that are mounted behind the seat right down to the breakdown kit including a warning triangle and reflective vest.

Over the years, our selection of accessories has been continually expanding taking into consideration the needs of today's motorcyclists and scooter riders. In respect of the two-wheeled machines themselves, we produce a wide range of accessories including engine bars which limit the damage in the event of a fall. Dedicated to the world of "off road" riding, we have introduced the brand new oil carter protectors which provide protection against impact from rocks and bumps on the road and there are the new universal halogen spotlights.

There is also a motorcycle cover and a seat cover to provide protection from dust and rain, an aluminium case holder, tubeless tyre repair kit, the list goes on and on. Behind every single GIVI accessory is the dedicated and targeted research of the R&D Department based at Flero.

SAFETY AND COMFORT S221

Unlike hard cases, soft bags do not have a lock and because of this, when reaching your destination, it is suggested that soft bags are removed from a motorbike. As we understand that this can be frustrating, the Givi S221 wire padlock can be used to secure soft bags to a motorbike. It locks the zip and blocks it, ensuring the bag is locked to either the handlebar or the rear rack

AIRSTARS & SPOILERS

In respect of styles and materials used, the collection of GIVI screens is the largest on the market and takes into consideration all the current trends. The range includes screens and aerodynamic spoilers equipped with specific fitting kits for the most popular naked, road and sporty motorcycles.

The collection also provides solutions for tourer, sport-tourer and cruiser motorcycles with both universal and dedicated screens and windshields available.

Finally, there is the scooter world for which GIVI has long been renowned, windscreens are available for a large number of models from 50cc to the larger engine capacities.

In terms of our latest news, we draw attention to the Airstar screens for scooters complete with serigraphy at the base to provide a strong visual impact and there is the new entry Airflow, the windscreen with an adjustable upper spoiler, designed by the GIVI R&D Department, which is unrivalled in terms of versatility and protection.

S180T SHIELD+

Universal transparent spoiler mountable to fairings / windscreens; the aluminium fitting kit allows to adjust both height and inclination.
The customer needs to confirm the original fairing/ windscreen is rigid enough to allow the mounting of the SHIELD +

S180T	Universal transparent spoiler that can be mounted to fairings / windscreens; the aluminium fitting kit allows both the height and angle to be adjusted.	
-------	---	--

S180F SHIELD+

Universal smoked spoiler mountable to fairings / windscreens; the aluminium fitting kit allows to adjust both height and inclination.
The customer needs to confirm the original fairing/ windscreen is rigid enough to allow the mounting of the SHIELD +

S180F	Universal smoked spoiler that can be mounted to fairings / windscreens; the aluminium fitting kit allows both the height and angle to be adjusted.	
-------	--	--

Shield+ is made entirely of billed aluminium that is manufactured one piece at a time using numerical controlled milling, finished by hand then finally anodized. Due to its excellent weight-performance and high resistance to corrosion, this high quality raw material is also used in aeronautical engineering. The screen is 4mm thick and is made from polymeric material approved by TUV. Compared to glass, it is more transparent and is half the weight of glass.

- Fitting is both simple and safe. In fact, installation does not require any modification of the existing windshield.
- Shield+ will fit onto any form of motorcycle / scooter windshield and lock keys are included as standard.
- The sleeves are made of a technical material that does not damage the existing windshield and guarantees optimum grip, even at high speed, making the shield+ reliable protection to deflect airflow.

COLLECTION

The appeal of “naked” motorcycles continues to interest a great many riders and it is for these motorcyclists that GIVI has created and produced a range of universal screens with a simple yet elegant design that ensures an excellent level of protection without spoiling the lines of the motorcycle. The fitting, with either 2 or 4 fixing points, is both quick and easy thanks to the stainless steel bars with clamps that are adjustable to the brackets. The models available meet the needs of even the most demanding of motorcyclists.

UNIVERSAL SCREENS

140A	Universal transparent screen 35 x 41 cm (H x W)	
------	--	--

140S	Universal smoked screen 35 x 41 cm (H x W)	
------	---	--

To mount this screen, it is necessary to combine it with the appropriate fitting kit (AL_ _ _A), specific to individual motorcycles.

100AL	Grey anodized aluminium universal screen Race Cafe, for naked motorcycles 20,5 x 26,5 cm (H x W)	
-------	---	--

100ALB	Black anodized aluminium universal screen Race Cafe, for naked motorcycles 20,5 x 26,5 cm (H x W)	
--------	--	--

A universal screen for naked motorcycles with a classic / modern style that perfectly reproduces the “café racer” look for which it was specifically designed. To embrace this philosophy, the screen has been made entirely of aluminium that has been finely brushed and then anodized and with a thickness of 2mm to withstand weathering. Essential, lightweight and technical there are no plastic components and it features either a gold or silver anodized aluminium riveted GIVI label, depending on the colour selected.

To mount this screen, it is necessary to combine it with the appropriate fitting kit (AL_ _ _A) specific to individual motorcycles.

COLLECTION

The universal GIVI cockpits represent an excellent example of the great attention that GIVI draws to the stylish design and to the quality level of its products. Each version is characterised by its unique style and by the capacity to perfectly adapt to the line of the front chassis. A GIVI cockpit can be light and less intrusive or can individualise the distinguishing characteristics of a sportsbike. Each version is made with a painted lower section in specific colours, fitted to a plexiglass screen. The functionality of these items is guaranteed by the use of universal fitting kits that make fitting extremely quick and easy.

MECHANICAL PART PROTECTION

ENGINE GUARDS

Conceived with the aim to provide lateral protection of the engine, not only on trail motorcycles, but also naked and custom motorcycles as well as unfaired and semi-faired models. Should a motorcycle fall whilst located on its stand and it is equipped with an engine guard, the damage sustained by the engine would be greatly reduced. The wide range of engine guards developed and produced by GIVI includes specific solutions for a wide variety of motorcycle models. For custom motorcycles, engine guards are available in a chromed version. The characteristics of the materials used offer excellent performance, guaranteed by GIVI expertise

OIL CARTER PROTECTORS

Specifically designed based on individual motorcycle models, the oil carter protector makes the image of the maxi-Enduro even more "off road". It protects the oil carter from impact resulting from rocks, bumps and holes whilst "off road" and also on less challenging roads.

BACKRESTS

GIVI aims to not only satisfy the needs of the rider, but also those of the passenger. We produce a wide range of backrests, made from foam polyurethane, which helps to create a more comfortable ride for those who sit over the "rear wheel". The mounting phase is totally free or can be combined with a top case, depending on the vehicle. Holder material: metal. Backrest material: Polyurethane foam.

STAND EXTENSIONS

The purpose of the range of GIVI Base Extensions is to extend the surface area of the side stand, reducing the risk of a motorbike falling when it is parked on uneven surfaces such as; mud, sand, grass or asphalt during extremely high temperatures. Produced in anodized, milled and satinised aluminium with the high support made of satinised 316L stainless steel and designed with a hard technical aspect, the stand extension integrates perfectly with your motorbike.

GIVI DESIGN SERVICE

The many features of GIVI products find their ideal setting in a display project designed to be in line with the Company's image.

To better support dedicated retailers like you, GIVI is putting at your disposal our in-house design team, offering you the possibility to have expert and reliable hands setting up the point of sale space in your retail point.

How does it work?

Contact your local agent to take advantage of this service. He will coordinate with the Sales Direction to start the process.

Once approved, you will be requested to send us the floor plan of your shop, with an indication of the area you want to dedicate to GIVI and possibly some detailed images.

Following your input, our **GIVI DESIGN SERVICE** will then create a project proposal and send you a presentation, along with the cost estimate, the contract proposal and an indication of the products to be displayed.

EXAMPLE OF DESIGN

NOTE

This image shows a full page of white paper with horizontal grey ruling lines. At the top center, there is a dark grey rectangular header containing the word "NOTE" in white, uppercase letters. The rest of the page is filled with evenly spaced horizontal lines, providing a template for writing.

This image shows a full page of blank, lined paper. It features approximately 20 evenly spaced horizontal grey lines across its entire surface, typical of notebook or composition paper. The background is a solid off-white color, and there are no margins, text, or other markings present.
