

A couple riding a motorcycle on a paved road. The rider is wearing a black jacket and helmet, and the passenger is wearing a white and black jacket and helmet. The motorcycle is equipped with Givi luggage, including a large silver top case and two side cases. The license plate is GV 18153. The background shows a road with palm trees and a red banner in the top right corner.

HARD BAGS

MONOKEY® SYSTEM

Monokey®, patented by GIVI, is the most widespread fitting system for hard cases and side cases. Simple to use, it allows operation with only one key both the opening of the case top and the detachment of the case from the fitting plate. All the Monokey® products combine the best characteristics of mechanical resistance and rigidity of the fitting, with features using compact and light components. The even distribution of the load on the plate surface is guaranteed by the three fitting points. The damping of oscillating and vibration and the contact between the bottom shell and the plate are assured by four spacers made of elastic material, which is particularly resistant to extreme weather and temperature variation. Thanks to these solutions a high level of reliability of the fitting is guaranteed.

MONOLOCK® SYSTEM

In order to offer a wider range of applications and uses, GIVI has introduced Monolock®. Following the same philosophy that defines the Monokey® fitting system; this second solution is mostly made for lighter vehicles, such as scooters and maxi-scooters. Even with limitations of maximum load, this system of fitting combines performances comparable to those of the Monokey® system with components boasting lighter and far smaller dimensional restrictions. Because of its natural compatibility with different kinds of motorcycles, it is appreciated by the most important brands of motorcycle producers, who have adopted it for their original accessories. As well as for Monokey®, the opening of the case top shell and the detachment of the case from the plate are operated with one key only.

MONOKEY® CAM-SIDE SYSTEM

The Trekker Outback are cases studied especially for the off-road use. For supporting all the demands that are subject in off road, they need fitting systems and side-case holders stronger than the Monokey®. For this reason it has been studied that the new Monokey® Cam-Side system, fixes the case in four different points maintaining at the same time the possibility to release from the rack quickly. The specific side-case holders are the PL__CAM and PLR__CAM that are manufactured using steel tubular with an 18 mm diameter, and are fixed to the bike in different points, in order to strengthen the structure. Besides the panel of the frame where the case is linked, it is better if the rubber supports points are moved in the perimetric zones of the case.

MONOKEY® SIDE SYSTEM

Introduced on the market in 2006, the Monokey® Side attaches onto the side of the above-mentioned two fitting systems, and thereby introducing different fitting solutions for the motorcyclist. Patented by GIVI, Monokey® Side represents an interesting evolution of the classic system constituted by the "fitment Kit plus the side-bag". The new solution introduces new advanced technical features and some other points of interest: the cases that adopt Monokey® Side can be recognized by the shaped profile of the bottom and by the addition of two new fixing points, composed by "sleds". The latter receive the disengagement movement from the case release button and determine a significant and further increase in overall stability. Monokey® Side allows greater adhesion of the case to the side of the motorcycle, improving the aerodynamic aspect. The motorcyclist's habits won't change, since it will continue to open/close and attach/detach the case equipped with Monokey® Side with one key and push button.

RETRO-FIT SYSTEM

RETRO-FIT is the new mounting system that opens new opportunities for the rider, allowing him to attach a set of aluminum Trekker Dolomiti side cases to any existing PL and PLR mounts, that are manufactured using steel tubular with an 16 mm diameter, originally designed for Monokey® cases. With this quick and secure adapter, it takes seconds to attach and detach the cases, without using any tools: the bottom part slides over the prongs on the bracket, while the top part is secured using two quick release fasteners, that fit to the included support which replaces the standard Monokey® locking wedge.

TREKKER OUTBACK ATV

OBK110A

Valigia Trekker Outback per quad, 110 litri di volume, con sistema di fissaggio "fixed system" direttamente sul portapacchi del quad.

- Struttura in alluminio e bordi in alluminio profilato
- Doppia cerniera
- Coperchio piano removibile e quattro passa cinghia
- Chiusura Security Lock con tappo copripolvere di serie
- Maniglie in acciaio inox per il trasporto e tappetino interno

Trekker Outback case for quad bike, 110 lt volume, with "fixed system" fitting structure, to be fixed directly to the rear rack of the quad.

- Aluminium design with edges in profiled Aluminium
- Double hinge
- Flat removable lid with four clamps
- Security Lock closure with dust cap as standard
- Handles in stainless steel for transportation and inner mat

Bauletto fisso nero con catadiottro rosso, dotato di kit universale per il fissaggio sul portapacchi delle biciclette. Il fissaggio al mezzo avviene tramite le 2 staffette metalliche contenute nel kit in dotazione ed utilizza come base di appoggio il portapacchi delle biciclette (quasi sempre previsto di serie nelle city-bike).

Top-case, capacity 25 ltr., complete with red reflector, equipped with universal fitting kit for mounting it on the carrier of the bicycles. The fitting is possible by mean of the 2 metallic supports included in the kit and uses as a support the luggage carrier of the bicycles (almost always provided on city bikes).

CAPACITY

Bauletto fisso nero con catadiottro rosso, dotato di kit universale per il fissaggio sul portapacchi delle biciclette. Può contenere un casco da bici, misura da adulto. Apertura a chiave laterale.

Il fissaggio al mezzo avviene tramite le 2 staffette metalliche contenute nel kit in dotazione ed utilizza come base di appoggio il portapacchi delle biciclette (quasi sempre previsto di serie nelle city-bike).

Top-case, capacity 14 ltr., complete with red reflector, equipped with universal fitting kit for mounting it on the carrier of the bicycles. It can hold a bicycle helmet in an adult size. Key opening lateral.

The fitting is possible by mean of the 2 metallic supports included in the kit and uses as a support the luggage carrier of the bicycles (almost always provided on city bikes).

SOFT BAGS

EASY-T RANGE

The Easy-T range of motorcycle bags is a restyling of the “entry-level” Easy line and includes a wide range of bags for general touring. The materials used (developed in accordance with the new Reach regulations) and the technical features designed for maximum efficiency ensure a high reliability of these bags, suitable for all 2-wheel users.

ULTIMA-T RANGE

The Ultima-T series offers the best performance in terms of both protection and comfort, perfecting the use of mechanical and universal mounting systems for a series of extremely versatile and useful cargo solutions and is a range dedicated to the most demanding of motorcycle tourers.

GRAVEL-T RANGE

The Gravel-T is a new line of completely waterproof bags, produced for off-road and touring. Especially suitable for light bikes such as Enduro and Superbikes, this specific range aims to meet the needs of the off-road biker, thanks to its technical features designed for enduro use.

SPORT-T RANGE

A line of semi-rigid bags designed for “quick-tourism”. Developed to obtain compact volumes and shapes with sports lines. The Sport-T range is particularly suitable for road and sport-touring bikes, with medium to medium/small volumes and technical fabrics laminated and with a reinforced structure (water-resistant, with UV protection). Tanklock and Multilock systems patented by GIVI adds further practicality of use, making the fitting/release system fast and secure.

METRO-T RANGE

A line of semi-rigid bags, suitable for bikes with a classic frame, in a retro or café racer style. Thanks to the versatility of the models in the range, with medium - medium/small volumes and technical fabrics (water-resistant, with UV protection) these bags are suitable for touring-urban use and therefore can be used with all bike models, from the classics, to more modern naked bikes.

CORIUM RANGE

Corium, the new line of soft bags, was designed for classic, retro or café racer motorcycles. The line consists of 4 highly versatile models, all with medium to medium-small load capacities, made by combining robust technical materials with two different colours of vegan leather, in a retro design.

XSTREAM RANGE

Sporty look from the express line for those who are not willing to compromise in terms of reliability and comfort. All materials will be developed in accordance with the new Reach regulations except the main fabric of the new Xstream products which will be treated anti-UV.
