IXON ASIA COLLECTION

QUALITY MOTORBIKE EQUIPMENT, INFUSED WITH FRENCH DESIGN AND OFFERING ASIA-SPECIFIC FEATURES

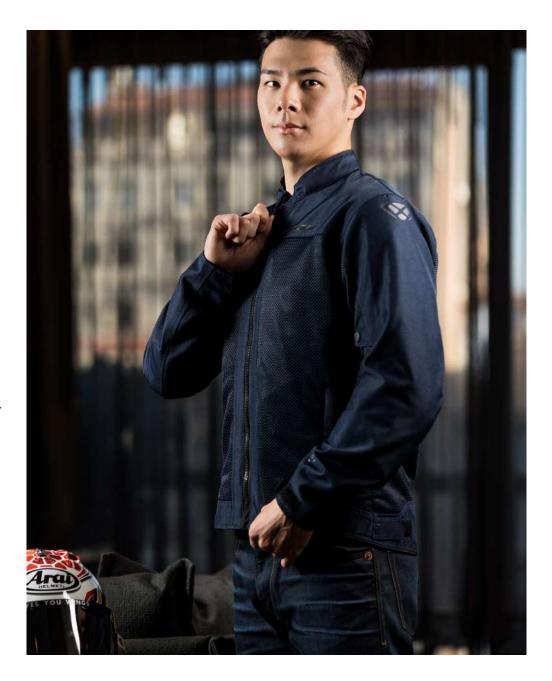

IXON is a brand of motorcycling equipment created by and for motorcyclists. **The company was founded in 1996 in France** by Thierry Maniguet, a big fan of motorcycling. Today it is an international brand distributed in over 70 countries. But it has stayed close to its roots. Thierry Maniguet is still at the head of IXON, and our headquarters are still in France, in Mâcon.

Our heritage comes from France, but so does much of our expertise: **our products are** *Designed in France*. France is known throughout the world for its style and clothes culture, and it's in France, at the IXON headquarters in Mâcon, that our products are born from the hands of our designers and our R&D team. IXON products are indeed developed at the brand's headquarters by our team of designers, all fans of motorbikes and clothes. Their aim is to create a link between the two worlds with a real guarantee to the user. IXON equipement is adapted to the user's specific motorcycling activity and features a high level of comfort while respecting fashion and trends. It also includes all the features required and demonstrates top-notch manufacturing quality.

Our dynamism comes from our "Think Global, Act Local" approach: we offer the same level of excellence worldwide, while adapting our work methods and our offer to the specific needs of users in various countries.

For several years, we have been offering an Asia collection with 4 main features tailored to the needs of Asian motorcyclists:

- 1/ Asian Fit
- 2/ Modular Concept
- 3/ Chest protective pockets
- 4/ Waterproof pocket

On our garments from Asia collection, all the **measurements** (length and width of the body, length and thickness of the limbs, etc.) and the **position of each protector** have been rethought to adapt to Asian morphologies. Our objective is clear: **in several ranges** (Urban, Roadster, Racing), to offer **motorbike equipment that is truly adapted to users in Asian countries**.

2/ MODULAR CONCEPT

Do you want to wear the same jacket even when the temperature drops? Then the MODULAR CONCEPT is perfect for you. Thanks to this innovation, we offer a line of versatile products that you can adapt to the conditions for a greater riding experience! The products featuring the MODULAR CONCEPT have indeed a connection system that allows an optional lining to be added quickly and easily to the inside of the product. By equipping your product with an optional lining, improve its warmth performance and enjoy the cold or chilly riding sessions like never before! Our optional linings are quality products made from materials carefully selected for their technical performance and comfort.

THE OPTIONAL LININGS

3 optional linings available to upgrade your equipment:

BAGS

MODULAR CONCEPT EMPOWERS FULL VERSATILITY

Ride your way no matter the season, no matter the conditions!

3/ CHEST PROTECTIVE POCKETS

For extra safety, jackets are equipped with chest protective pockets.

These pockets can accommodate optional ARMOR CHEST protectors and optional FANOM CHESTB_2 protectors.

ARMOR CHEST

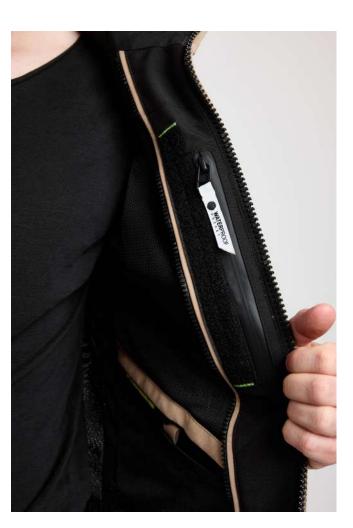

FANOM CHESTB_2

4) WATERPROOF POCKET

Many jackets include a waterproof pocket to protect your smartphone or wallet.

With this 100% waterproof pocket, well integrated into the jacket's design, you can ride with complete peace of mind!

PROTECTORS: THREE RANGES

Garments in the IXON Asia collection feature three ranges of shoulder-elbow-knee protectors.

FANOM SEKA_1

CE certified shoulder-elbow-knee protector Type A, Level 1, T+, T-, compliant with the EN 1621-1:2012 standard

fanom® technology has revolutionised protection thanks to a smart-design injected structure providing maximum comfort to the rider. This structure is ultra flexible, ultra light, ultra thin and ultra ventilated.

fanom® products are sustainable products for motorcyclists and the environment. Made with thermoplastic material with an injection molding production process, fanom® protectors represent a wirtually waste-free manufacturing while being also washable and 100% recyclable.

IX-PROSOFT A1

CE certified shoulder-elbow-knee protector Type A, Level 1, T+, T-, compliant with the EN 1621-1:2012 standard

The ultra-flexible protection developed by IXON offers excellent comfort. Once inside the jacket, the IX-PROSOFT A1 is completely invisible: you don't feel it, it doesn't restrict your movements.

Thanks to its construction, this protection is highly ventilated. This protection is also very light: the IX-PROSOFT A1 is 30% lighter than the IX-PROFLEX SEKA-1.

IX-PROFLEX SEKA-1

CE certified shoulder-elbow-knee protector Type A, Level 1, T-, compliant with the EN 1621-1:2012 standard

Developed by IXON, the IX-PROFLEX SEKA-1 features bevelled hexagons with a unique design to provide flexibility, ventilation and resistance to impacts.

The complex structure, combined with a choice of flexible, but highly resistant materials, goes to make an injected, pre-formed protection that is very user-friendly, with a level of thickness making it very comfortable and discreet to wear.

PROTECTORS: Upgrade your gear to improve your comfort and safety

IMPROVE YOUR COMFORT

The protection pockets in IXON garments are designed to accommodate fanom® protectors, so all products equipped with IX-PROSOFT A1 protectors or IX-PROFLEX SEKA-1 protectors can be upgraded with FANOM SEKA_1 protectors. fanom® protectors are the best protectors in our range: FANOM SEKA_1 is indeed the most flexible, the lightest, the thinest and the most ventilated protector in our offer.

IMPROVE YOUR SAFETY

Thanks to the optional fanom® protectors available in our range, you can improve your safety with optional protectors for the back, the chest and the hip areas.

We indeed provide a range of fanom® products for all your needs:

FANOM SEKA_1Shoulder-elbow-knee protector
Type A, Level 1

FANOM HIP TYPE B Hip protector Type B, Level 1

FANOM CHESTB_2 Chest protector Type B, Level 2

FANOM BFB_1 Back protector Type FB, Level 1

FANOM BFB_2 Back protector Type FB, Level 2

Fanom®

SUSTAINABLE PROTECTION FOR MOTORCYCLISTS AND THE ENVIRONMENT:

• Thermoplastic material • Injection molding production process • Virtually waste-free manufacturing • Washable and 100% recyclable protectors

All fanom® protectors come with additional T+ or T+ and T- certification. This **additional T+ and T- certification** guarantees that fanom® protectors retain their mechanical properties in both summer and winter: flexibility and shock absorption are unchanged no matter the temperature outside (+40°C/-10°C).

PROTECTORS: CHANGES TO EXISTING PRODUCTS

Several existing products have undergone changes to their shoulder-elbow-knee (SEK) protectors in the 2025 collection. For each product, the changes apply to all existing colours.

On the product pages, the following red pictogram will help you identify the products concerned by the change of protectors:

FOOTWEAR: INTEGRATED TECHNOLOGIES

FIDLOCK® Winch is an innovative system offering a unique combination of magnetic fastening, tightening and adjusting. In the knob, laces are wound up around a spool. The knob can be pulled off completely and detached from the base: laces unwind when the system is opened. When reattaching the knob. magnetic force guides it into the correct position. Once the system is closed, laces tighten when turning the knob. Pre-tension can be applied before winding up. Fast and easy to use for motorcyclists, the FIDLOCK® Winch® system can be operated with just one hand!

OrthoLite®, which was launched in 1997, is the leading manufacturer and supplier of **open-cell foam inner sole technologies** for the largest footwear brands worldwide.

OrthoLite® partners with over 400 major brands and manufactures some 500 million pairs of soles every year for these brands' footwear.

Major running shoe brands such as Adidas, Asics, Mizuno and Salomon have chosen the OrthoLite® technology in the last few years.

As part of its continuous innovation process, IXON has decided to integrate this technology into its motorbike shoes.

OrthoLite® soles are made of open-cell polyurethane foam. The alveolar sole drains off humidity more easily, has a greater resistance to impacts and wears less quickly than traditional soles. The composition is also more lightweight, more breathable and provides greater odour control.

ENVIRONMENTAL APPROACH

All OrthoLite® open-cell foams contain 5% recycled rubber from the production of outer soles. This is where the notable black spots seen on all OrthoLite® foams come from. This exclusive technology adds resilience, breathability, shock absorption and comfort to the soles, and furthermore, it prevents over 300 tonnes of recycled rubber from ending up in tips every year.

Soles by Michelin are high performance technical soles inspired by more than a century of relentless innovation from the iconic tyre company Michelin.

The parallels between tyre technology and technical soles are as striking as the connection between the soles of your feet and the ground beneath them. It's why Michelin is using its unrivalled expertise in rubber and tread design to equip the world's leading performance footwear brands with technically advanced outsoles.

The choice of Soles by Michelin for a selection of IXON shoes offers a number of important benefits for motorcyclists: comfort, stability, grip and endurance.

WATERPROOFING & BREATHABILITY

Waterproofness is a fabric's ability to **resist water penetration**. **Breathability** is a fabric's ability to **evacuate water vapour**, and therefore the rider's perspiration (due to heat or stress). When riding a motorcycle, water from the outside (rain or projections for instance) and perspiration are detrimental as feeling wet quickly impacts comfort.

Waterproof IXON equipment are also breathable: they provide protection from water, while allowing perspiration to be evacuated in order to preserve riding comfort.

Waterproofness and breathability can be measured. We use **Schmerber's water column test** to determine the waterproofness rating and the **MVTR rate** to determine the breathability rating.

HERITAGE

WATERPROOFING PERFORMANCE: SCHMERBER'S WATER COLUMN TEST

Schmerber's water column test is used to give a material a waterproofing rating in Schmerber (from Charles-Edouard Schmerber, who devised the measuring tool). During the test, the clothing's fabric is subjected to the pressure of a water column, with a water column millimetre representing 1 Schmerber and 0.1 mbar of pressure. The test stops when the water starts penetrating the clothing and the water height it has endured is then measured. This value in water column millimetres indicates the material's waterproofing rating: the higher the value, the more waterproof the material.

Due to the pressure applied to motorcycle equipment caused by speed or wind when riding, specific performance levels are required for motorcycle equipment, much higher than for everyday clothing.

The ISO standard considers a fabric to be waterproof when it reaches 1300 mm / 1300 Schmerber. As an indication, rain rarely surpasses the equivalent of 2000 mm. However, in the case of a motorbike going at 130 km/h in the rain, the pressure of water on the clothing can reach about 8000 mm.

BREATHABILITY PERFORMANCE: THE MVTR INDEX

The MVTR index is used to indicate a material's breathability rating. MVTR stands for "Moisture Vapour Transmission Rate". It measures the quantity of water vapour in grammes let through by a square metre of material in 24 hours. The value is expressed in g/m²/24 hours and indicates the material's breathability rating: the higher the value, the more breathable the material.

IXON PRODUCTS' WATERPROOFING AND BREATHABILITY

GARMENTS

The IXON Asia collection offer 2 ranges of waterproofing and breathability for garments: XDRY3L and DryMesh. Each range offers different levels of performance to provide the most appropriate technology to drivers, according to their use.

| | | WATERPROOFING | BREATHABILITY | PICTOGRAM |
|---------|-----------------|---------------|---------------|---------------|
| | XDRY3L § | 14 000 | 20 000 | 14 000 20 000 |
| XDRY3L | XDRY3L 🖫 | 10 000 | 5 000 | 10 000 5 000 |
| | XDRY3L E | 10 000 | 3 000 | 10 000 3 000 |
| DryMesh | | 3 000 | 2 000 | 3000 2000 |

For the most demanding riders, a selection of IXON products are laminated with XDRY3L technology: the "3L" in XDRY3L stands for "Light Laminated Layers".

XDRY3L technology integrates the waterproof and breathable XDRY membrane developed by IXON directly into the outer material using a lamination process, i.e. a process of assembling several layers. With XDRY3L technology, three lightweight layers are laminated to form a single high-performance material: the outer fabric, the XDRY membrane and the inner layer.

Laminated construction with XDRY3L technology undeniably enhances comfort and the riding experience in many ways. By combining both protection and waterproofing in a single material, lamination makes it possible to offer lighter equipment. Laminated construction also offers an excellent benefit in the event of rain: water does not penetrate the outer material and this outer material of the equipment does not become waterlogged. As a result, the garment remains lighter, retains all its ability to act as a barrier against water while still being breathable, and prevents the feeling of cold. Finally, the laminated construction has a definite advantage when it comes to coping with the heat: once the ventilation zips are open (if the garment is fitted with them), the cool air flows directly onto the rider's body without having to pass through an additional waterproof and breathable membrane. So the ventilation system is highly effective.

GLOVES

IXON gloves offer 2 waterproofing and breathability technologies: XDRY for Winter gloves and XDRY GRIP for Mid-season gloves.

| | | WATERPROOFING | BREATHABILITY | PICTOGRAM |
|-----------------------------------|----------|---------------|---------------|-----------|
| XDRY WINTER GLOVES | XDRY : | 8 000 | 8 000 | 8000 8000 |
| XDRY GRIP MID-SEASON GLOVES | XDRY & C | 8 000 | 8 000 | 8000 8000 |

Winter gloves with XDRY waterproofing technology = the insulation is located on both sides of the hand, on the back and palm. This creates a comfortable fit as no "folds" can be felt in the XDRY waterproof membrane.

Mid-season gloves with XDRY GRIP waterproofing technology = there is partial insulation located on the back of the hand only and not on the palm, or no insulation at all depending on the models. In all cases, the XDRY waterproof membrane is laminated directly on the palm, becoming XDRY GRIP: this offers an improved grip on the handlebars and a better feel for the controls.

BETAC® SHOULDER PROTECTOR

BETAC® ELBOW PROTECTOR BETAC® KNEE PROTECTOR

L XL 2XL 3XL

MATERIALS

• Thick and supple cow leather

FEATURES

- Micro perforated leather
- Localized micro perforations to avoid weakening the leather on stitching areas
- High abrasion resistance synthetic fabric reinforcements on exposed areas: forearms and knees
- 2-layers of leather on buttocks and foam reinforcements on coccyx area
- Multi-material reinforcement (double layer of leather and 3D Air Spacer Mesh) for safety and better air flow (chest, biceps, triceps, shoulder, thighs)
 • Pockets for protectors in 3D Air Spacer Mesh for better air flow
- Highly ventilated aerodynamic hump with air extractors and equipped to welcome a water bladder
- · Compatible with IX-AIRBAG UO3 vest
- · Removable Mesh lining
- 2 internal pockets

FIT AND COMFORT

- · Asia Fit
- Cut: Fit
- MotoGP inspired dual-density sleek shells on shoulders and knees
- Flex leather on sides, on back of armholes and on bottom back
- Stretch inside sleeves and on all the leg length, from crotch to calves
- Grip inside knees
- Removable and adjustable elbow sliders
- Knee sliders included, adjustable and replaceable
- Thumb loop straps (which prevent the sleeve from coming up in case of a fall)
- Great combination with our underlays: UNDERGROUND, UNDERGROUND TOP and UNDFRGROUND PT

SAFETY

- · Shoulder/elbow protectors: BETAC® Level 1
- · Knee protectors: BETAC® Level 1
- Hip protectors: BETAC® Level 2

IX-SOFT CHEST

IX-PROFLEX SEKA-1

MATERIALS

- Outer shell: Thick and supple cow leather
- · Insulation: Zipper to connect the optional THERMAL LINER A

FEATURES

- Ventilation: micro-perforations in the leather (so that leather is not weaker
- Collar: racing collar with neoprene brace and tab to fasten
 Fastening: semi-autolock zippers at the wrists, tightening straps at the bottom of the jacket
- Pockets: 2 outside pockets, 3 inside pockets with one waterproof wallet pocket
- Reflective panels on biceps and rear belt, connection to trousers (zip around the waist and loop at the back)

FIT AND COMFORT

- Asia Fit
- · Cut: Regular
- Comfort: 4-direction stretch fabric inside sleeves, at armholes and on sides

SAFETY

- Shoulder/elbow protectors: IX-PROFLEX SEKA-1
 Chest protectors: IX-SOFT CHEST
- Back protector pocket (back protector available as an option)

SIZE GUIDE

MEASUREMENTS

To see which size will suit you, take the measurements shown below.

(A) HEIGHT

Stand up with your legs straight and measure your height.

(B) CHEST SIZE

Place your tape measure around the widest part of your chest and breathe normally.

WAIST SIZE

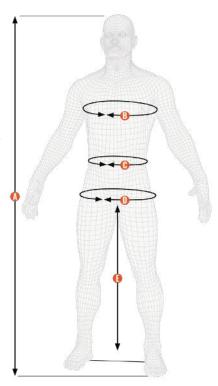

Place your tape measure just below your bottom ribs around your stomach.

HIP SIZE

Place your tape measure around the widest part of your hips and buttocks.

(1) CROTCH TO ANKLE

Stand up with your legs straight and measure from the crotch to the ankle.

JACKETS

| MEN | | | | | | | | | |
|--------------------------|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| SIZE | XS | S | M | L | XL | 2XL | 3XL | 4XL | 5XL |
| A HEIGHT (cm) | 155-162 | 160-167 | 165-172 | 170-177 | 175-182 | 177-184 | 180-187 | 183-190 | 186-193 |
| B CHEST SIZE (cm) | 83-89 | 87-93 | 91-97 | 95-101 | 99-105 | 103-109 | 107-113 | 111-117 | 115-121 |
| G WAIST SIZE (cm) | 68-74 | 72-78 | 76-82 | 80-86 | 84-90 | 88-94 | 92-98 | 96-102 | 100-106 |
| D HIP SIZE (cm) | 80-88 | 84-92 | 88-96 | 92-100 | 96-104 | 100-108 | 104-112 | 108-116 | 112-120 |

| WOMEN | | | | | | |
|-------------------|---------|---------|---------|---------|---------|---------|
| SIZE | XS | S | M | L | XL | 2XL |
| A HEIGHT (cm) | 145-152 | 150-157 | 155-162 | 160-167 | 163-170 | 166-173 |
| B CHEST SIZE (cm) | 75-81 | 79-85 | 83-89 | 87-93 | 91-97 | 95-101 |
| C WAIST SIZE (cm) | 58-64 | 62-68 | 66-72 | 70-76 | 74-80 | 78-84 |
| D HIP SIZE (cm) | 80-87 | 84-91 | 88-95 | 92-99 | 96-103 | 100-107 |

PANTS

| MEN | | | | | | | |
|------|-------|-----------|-------|-----------|-------|-----------|-------|
| SIZE | XS | S | М | L | XL | 2XL | 3XL |
| (cm) | 71-82 | 72,5-83,5 | 74-85 | 75,5-86,5 | 77-88 | 78,5-89,5 | 80-91 |

CHOOSE YOUR SIZE

Compare your measurements to the charts. If your measurements produce different sizes, choose the next size up to cover all measurements.

Example for a men's jacket:

- B = 98cm: L
- C = 88cm: XL
- D = 94cm: L
- So XL is the right choice

GLOVES

(1) HAND SIZE

Wrap your tape measure around the palm of your hand, just below the knuckles.

| SIZE CONVERSION | | | | | | | | | |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| SIZE | INT | XS | S | М | L | XL | 2XL | 3XL | 4XL |
